Ext806-D13-7a1 Describer Kevin Konrad Acample Location Gulf of Mexico - Big Dipper Carbonate Describer Mudstone Mudstone Whole Rock Original (%) Total Groundmass Original (%) Total Groundmass Replaced (%) Whole Rock Summary A carbonate mudstone with some corals attached to the surface. The sample contains a mottled greyish interior with no discernable mineral grains. The rock has a thin patchy FeMn coat.			General Info	ormation				Whole Rock		Transmitted Light

Modelson Control (S)										
Section Sommary Same looks very similar to D13-3Af. A very fine grained carbonate matrix with coarset [100m] grains of findigar, questr, mice and doubters sample contains a mottled grains. The result of fine section Sommary Same looks very similar to D13-3Af. A very fine grained carbonate matrix with coarset [100m] grains of findigar, questr, mice and debrates. Some patitivy FeMn infilling is found towards the rin of the rod. Section Sommary Same looks very similar to D13-3Af. A very fine grained carbonate matrix with coarset [100m] grains of findigar, questr, mice and debrates. Some patitivy FeMn infilling is found towards the rin of the rod. Section Sommary Same looks very similar to D13-3Af. A very fine grained carbonate matrix with coarset [100m] grains of findigar, questr, mice and debrates. Some patitivy FeMn infilling is found towards the rin of the rod. Section Sommary Same looks very similar to D13-3Af. A very fine grained carbonate matrix with coarset [100m] grains of findigar, questr, mice and debrates. Some patitivy FeMn infilling is found towards the rin of the rod. Section Sommary Same looks very similar to D13-3Af. A very fine grained carbonate matrix with coarset [100m] grains of findigar, questr, mice and debrates. Some patitivy FeMn infilling is found towards the rin of the rod. Section Sommary Same looks very similar to D13-3Af. A very fine grained carbonate matrix with coarset [100m] question fine patients and the rin of the rod. Section Sommary Same looks very similar to D13-3Af. A very fine grained carbonate matrix with coarset [100m] question fine patients and the rin of the rod. Section Sommary Same looks very similar to D13-3Af. A very fine grained carbonate matrix with coarset [100m] question fine patients and the rin of the rod. Same looks very similar to D13-3Af. A very fine grained carbonate matrix with coarset [100m] question fine patients and the rin of the rod. Same looks very similar to D13-3Af. A very fine grained carbonate matrix with coarset [100m] question
